Profile

I am a versatile designer with a wealth of product design & development experience gained during a 20 year career. Working closely with stakeholders I have led the design and enhancement of user experiences for numerous products on platforms including web, responsive, app, admin, social and print media.

Education

BSc Product Design & Development

Aug 1999 – Jun 2002

Salford University, United Kingdom

Current Employment

Senior UX Designer

Oct 2023 – Present

Asurion, Tokyo Japan

- Iteratively improved the Home+ service UX/UI based on user feedback, usability testing, and analytics.
- Developed and maintained design systems and guidelines for consistency and scalability.
- Collaborated closely with cross-functional teams, including product managers and developers.

Core Projects • Asurion Home+ • [au Tsukasapo app](#)

UX Designer

Jul 2021 – Sep 2023

- Led the design efforts for au client apps over a 2-year period, using wireframes, prototypes, and mockups to communicate design concepts.
- Participated in thorough user research and utilized data-driven insights to inform design decisions.

Core Projects • [au Tsukasapo app](#) • [au Photo Cloud app](#)

UX Engineer

Jun 2020 – Jun 2021

- Collaborated with the engineering team to deliver complex UI designs and specs across multiple systems, integrating with Zeplin and Storybook.

Core Projects • Customer & Agent Chat Systems • Admin & CMS Tools

Achievements

- Mentored and provided guidance to junior designers and new joiners, fostering a collaborative and innovative design culture.
- Facilitated design-to-development communications, resulting in the au Photo Cloud localization being released 2 months ahead of schedule.

Employment

Senior Product Designer

Jan 2017 – May 2020

Geronigo, Japan - Remote

- Created a new international activities website and app, leading the end-to-end design process from concept ideation to final implementation.
- Iterated on the design of key features, including search functionality, booking management, and event management, relying on A/B testing and analytics data.
- Redesigned affiliate marketing and subscription products and established automated processes to reduce administrative costs.
- hotbertaa.github.io

Designer & Front End Developer

Jan 2009 – Dec 2016

Go Ballistic, Japan - Remote

- Led the design, continuous improvement, and re-designs of the product family comprising 500+ websites.
- Developed component and CSS frameworks for cross-product features, considering scalability to reduce UAT efforts.
- Iterated design enhancements based on user feedback and analytics.

Lead Web Designer

Feb 2006 – Jan 2009

The Activity People, United Kingdon

Led end-to-end design and development of websites, B2B CMS tools, WordPress blogs, brand creation, social media, and email marketing.

Web & Visual Designer

Mar 2005– Feb 2006

Valehall, United Kingdon

Led the design and expansion of a printing organization’s sales websites, in addition to providing graphic design support, branding, and Email Marketing.
